ABSTRACT: Today Indian Banks are as technology savvy as their counter parts in developed countries. The banking sector plays an important role in the economic development of a country. It supplies the lifeblood –money that supports and fosters growth in all the industries. FDI is a tool for economic growth through its strengthening of domestic capital, productivity and employment. FDI also plays a vital role in the up gradation of technology, skills and managerial capabilities in various sectors of the economy. Foreign Direct Investment as seen as an important source of non-debt inflows and is increasing being sought as a vehicle for technology flows and as a means of attaining competitive efficiency by creating a meaningful network of global inter-connections. This paper discusses the FDI Equity inflows in Service Sector in India and also highlights the top countries which are investing in the Service Sector in the form of FDI. In this paper an attempt is made to present the FDI inflows in sub sectors of Service Sector.

Keywords: Foreign Direct Investment, Service Sector, Banking Sector, FDI Equity Inflows, Indian Economy

I. INTRODUCTION

Today Indian Banks are as technology savvy as their counter parts in developed countries. The competitive and reform force have led to the emergence of internet, e-banking, ATM, credit card and mobile banking too, in order to attract and retain the customers by bank. As a result of Liberalization, Privatization and Globalization mode, Indian banks going global and many global banks setting up business in India, the Indian banking system is set to involve into a totally new level it will help the banking system grow in strength going into the

future. The banking sector plays an important role in the economic development of a country. It supplies the lifeblood –money that supports and fosters growth in all the industries. True, monetary resources per se, cannot ensure business success, which requires competencies on several other fronts, including technology, availability of skilled manpower, well-managed structure and a well-executed competitive strategy. FDI is a tool for economic growth through its strengthening of domestic capital, productivity and employment. FDI also plays a vital role in the up gradation of technology, skills and managerial capabilities in various sectors of the economy. Foreign Direct Investment as seen as an important source of non-debt inflows and is increasing being sought as a vehicle for technology flows and as a means of attaining competitive efficiency by creating a meaningful network of global interconnections. FDI plays a vital role in the economy because it does not only provide opportunities to host countries to enhance their economic development but also opens new vistas to home countries to optimize their earnings by employing their ideal resources. According to the 2015 World Investment Report released by the United Nation’s Conference on Trade and Development (UNCTAD), of 179 major global companies surveyed, India is considered to be the third most-preferred investment destination after China and the United States.

II. FOREIGN DIRECT INVESTMENT

Definition

International Monetary Fund (IMF) and Organization for Economic Cooperation and Development(OECD) define FDI similarly as a category of cross border investment made by a resident in one economy (the

direct investor) with the objective of establishing a 'lasting interest' in an enterprise (the direct investment enterprise) that is resident in an economy other than that of the direct investor. The motivation of the direct investor is a strategic long term relationship with the direct investment enterprise to ensure the significant degree of influence by the direct investor in the management of the direct investment enterprise.

2.1.Components of FDI

There are three components of FDI, namely, equity capital, reinvested earnings and intra company loans

1.Equity capital is the foreign direct investor's purchase of shares of an enterprise in a country other than his own country.

2. Reinvested earnings comprise the direct investor's share (in proportion to direct equity participation) if earnings not distributed as dividends by affiliated or earnings not remitted to the direct investor. Such retained profits by affiliates are reinvested.

3. Intra company loans or intra-company debt transactions refer to short or long term borrowing and lending of funds between direct investors (parent enterprises) and affiliate enterprises.

FDI in banking sector can solve various problems of the overall banking sector. Such as: Innovative

1. Financial Products
2. Technical Developments in the Foreign Markets
3. Problem of Inefficient Management
4. Non-performing Assets
5. Financial Instability
6. Poor Capitalization

If we take into consideration the root cause of these problems, the reason is low-capital base and all the problems are the outcome of the transactions carried over in a bank without a substantial capital base. In a nutshell, we can say that, as the FDI is a non-debt inflow, which will directly solve the problem of capital base.

2.2.Benefits of FDI

Technology Transfer

As due to the globalization local banks are competing in the global market, where Innovative financial products of multinational banks is the key limiting factor in the development of local bank. They are trying to keep pace with the technological development in the banks. Now a day's banks have been prominent and prudent in the rapid expansion of consumer lending in domestic as well as in foreign markets. It needs appropriate tools to assess (how such credit is managed) credit management of the banks and authorities in charge of financial stability. It may need additional information and techniques to monitor for financial vulnerabilities. FDI's tech transfers, information sharing, training programs and other forms of technical assistance may help meet this need.

Better Risk Management

As the banks are expanding their area of operation, there is a need to change their strategies exerts competitive pressures and demonstration effect on local institutions, often including them to reassess business practices, including local lending practices as the whole banking sector is crying for a strategic policy for risk management. Through FDI, the host countries will know efficient management technique. The best example is Basel II. Most of the banks are opting Base II for making their financial system safer

Financial Stability and Better Capitalization

Host countries may benefit immediately. From foreign entry, if the foreign bank re capitalize a struggling local institution. In the process also provides needed balance of payment finance. In general; more efficient allocation of credit in the financial sector, better capitalization and wider diversification of foreign banks along with the access of local operations to parent funding, may reduce the sensitivity of the host country banking system and lead towards financial stability.

III. FDI in Indian banks

The traditional argument against foreign equity participation in domestic companies is that these

businesses often involve national and strategic interests and therefore, operational and strategic control must be retained to prevent a take-over or a buyout [Lam (1997)]. Until 1993, most Indian banks were 100 percent owned by the central government and private investment was allowed only in a handful of private banks formed around the 1940s. Further, foreign banks and financial institutions were allowed only 20 percent ownership stakes in Indian banks. In 1993-94, nine new banks were formed in the private sector and one cooperative bank was converted to a private bank. Banks were permitted to issue Certificates of Deposits (CDs) and offer foreign currency deposits to Nonresident Indians (NRIs) with exchange rate risk borne by the banks. A major push towards liberalization occurred in 1995- 96 when India committed to the World Trade Organization (WTO) recommendations and relaxed the requirement to continue shielding the priority sector from foreign equity participation. For the next five years, changes in the banking sector mainly aimed at allowing banks more flexibility in the design and marketing of products.

Ceiling on FDI in Indian banks

In the private banking sector of India, FDI is allowed up to a maximum limit of 74 % of the paid-up capital of the bank. On the other hand, Foreign Direct Investment and Portfolio Investment in the public or nationalized banks in India are subjected to a limit of 20 % in totality. This ceiling is also applicable to the investments in the State Bank of India and its associate banks. FDI limits in the banking sector of India were increased with the aim to bring in more FDI inflows in the country along with the incorporation of advanced technology and management practices. The objective was to make the Indian banking sector more competitive.

IV. Objectives of the Study

1. To present the Foreign Direct Investment inflows in Banking Sector.
2. To study and analyze the Foreign Direct Investment inflows in Service Sector.

Research Methodology

This is a Descriptive as well as Analytical type of research in nature. This study is purely based on secondary data. The secondary data was collected from various sources such as Journals, Articles, RBI publications, Ministry of Finance publications, Department of Industrial Policy & Promotion publications, SIA newsletter, Online database of FDI and Newspapers etc. Data was analyzed by using statistical tools such as Tables.

Foreign Direct Investment Inflows in Banking Sectors

Table 1: Fdi Equity Inflows in Banking SECTOR (from January, 2000 to December, 2010)

Sr. No.	sector	Rupees in crore	US \$ in million	Total FDI (In terms of US \$)	Total FDI in Service Sector (In terms of US \$)
1	Banking sector	13471.6	3099.06	1.89	11.64

Year Wise FDI Equity Inflows in Banking Sector

Year wise FDI Equity inflows in Banking Sector from January, 2011 to June, 2013 have been shown in the table-2 as below

Table 2: Fdi equity inflows in banking SECTOR (From January, 2011 to June, 2015)

Sr. No.	Year	Rupees in crore	US \$ in Million	Total FDI (In terms of US \$)	Total FDI in Service Sector (In terms of US \$)
1	January-December, 2013	147015	28.88	0.1	.56
2	January-December, 2014	251.53	46.25	0.2	.99
3	January-June, 2015	1702.03	295.44	2.72	17.06

Source: DPIPP-SIA News Letter

It is evident from the Table that the Banking Sector received FDI Equity inflows during period from January to December, 2012 was an amount of Rs. 147.15 crores (US \$ 28.88 million) which account for 0.10 per cent of total FDI inflows and 0.56 per cent in total Service Sector FDI inflows in terms of US \$. Banking Sector received Rs. 251.53 crores (US \$ 46.25 million) in the form of FDI that account for 0.20 per cent of total FDI and 0.99 per cent of Service Sector FDI inflows. When compared to Jan-Dec, 2013, FDI inflows in Banking Sector increased by 41.49 per cent for the same period in 2014. Rs.

1702.13 crores (US \$ 2.72 million) of FDI inflows received during period from January to June, 2015 which account for 2.72 per cent of total FDI inflows and 17.06 per cent of total Service Sector FDI inflows in Banking Sector. It is very clear from the above discussion that the FDI Equity Inflows in Banking Sector have been increasing year by year.

- India is considered to be the Third most preferred investment destination in the world after China and United States.
- Service Sector is one of the most dominating sectors of Indian economy in attracting highest FDI Equity inflows which account for 19 per cent of total FDI equity inflows.
- Among the sub sectors of Service Sector, Financial Services stood at top place in attracting more FDI Equity inflows (7.28%), followed by Non-Financial/ Business Services (5.62%), Banking Services (1.74%) and Insurance Services (1.68%).
- Top countries that are investing in the form of FDI in Service Sector are-Mauritius (39.12%), Singapore (14.78%) and United Kingdom (8.24%).
- FDI in Banking Sector can solve various problems such as Inefficient Management, Non-Performing Assets, Financial Instability and Poor Capitalization.
- FDI Equity inflows in Banking Sector have been increasing year by year in an increasing trend.

V. CONCLUSION

FDI plays a vital role in the economy by providing opportunities to host countries to enhance their economic development. India is considered to be the third most preferred investment destination in the world. It is observed that Service sector is one of the dominating sectors in attracting more FDI inflows. The top countries investing in the form of FDI in Service Sector are Mauritius, Singapore and United Kingdom. FDI in Banking Sector solves various problems like Inefficient Management, NonPerforming Assets, Financial Instability and Poor Capitalization. Further, FDI in Banking Sector provide benefits of Technology Transfer, Better Risk Management, Financial stability, Innovative Products

and Employment. Interestingly, FDI inflows in Banking Sector have been increasing year by year. It is found that, during period from January to June, 2013 Banking Sector received FDI inflows Rs.1702.03 crores which account for 17.06 per cent of total FDI in Service Sector. It is very high FDI inflows in Banking Sector when compared to the same period of other calendar years.
