Professor in SIT, JNTUH, Hyderabad,

A.Ananda Rao,

Director R&D, JNTUA, Anantapuramu,

Abstract

Currently, in India and worldwide, the number of cybercrime cases is rapidly increasing, as can be seen in different types of social media such as news groups on the Internet, online news sites, most popular news papers, and magazines we really depend on for latest news. Cybercrime is the crime committed using computer as a tool or a target. We have taken up a cybercrime case study related to JNTUHJAC and Fake Government of Telangana (FGoT) cybercriminal organization, as part of our research work, and have been tracking the progression and response against these cybercrimes by the related public authorities namely, JNTUH University administrators, and police personnel of K.P.H.B Police Station, Hyderabad. The two organizations namely i) <http://jntuhjac.com> which is an online organization with the cybercriminal content in the image to the R.H.S of its home page is known as Online Fake Government of Telangana (Online FGoT) and ii) JNTUHJAC which is an offline organization, prevalent in the academic premises of the JNTUH academic community continuing its organized activities, is known as Offline Fake Government of Telangana (Offline FGoT). These two organizations were born in 2011 and prevalent during the Telangana separatist movement in the years 2011-2014. They still exist in JNTUH academic community and are collectively known as the Online Offline Fake Government of Telangana (OOFGoT).

We utilized various types of IT devices to defuse the cybercriminal activities of OOFGoT such as ICT approaches, Social Networking Site accounts and Information Transparency principle. We also opted various empirical ways such as field reporting, forming Pronational workforce, and publishing well-indexed research papers etc. to defuse the effects of these cybercrimes. It is reflected through our research publications made over many years in our research group. We have brought out the Pronational workforce recently in 2018 year, which builds and develops Quality-of-National-Life (QoNL) and paves way to Road to Information Technology (RIT) by means of RTI. This way we contribute to the success of right Information Technology, i.e. RIT. We brought awareness about the context of this cybercrime among public authorities, and the response from the public authorities namely, Governor's Secretariat, the Prime Minister's Office, A.P Secretariat Office, Rajya Sabha Secretariat, TSPSC, and DST reflect the fact that these kinds of cybercrime incidents were not desirable for any nation. They destroy the national spirit and pave way for more cybercrimes, if the related cybercriminals are left unpunished. We gathered data through RTI Act 2005 from the above mentioned public authorities, and analyzed to bring out the essence and required methods for handling cyber crimes of related types. We sensitized and insisted proper cyberpolicing to pass prohibition orders against the JNTUHJAC and FGoT cybercriminal organizations and to rightly work for conviction of these cybercriminals.

Keywords

Fake Government of Telangana(FGoT), Online Offline Fake Government of Telangana(OOFGoT), Government of Telangana 2011(GoT2011), Jawaharlal Nehru Technological University Hyderabad-Joint Action Committee(JNTUH-JAC), Cyber laws, Government of Telangana 2014(GoT2014), Quality of National Life (QoNL), Wayback machine, Web robot, Right-to-Information(RTI) Act 2005, State Emblem of India Prohibition of Improper Use Act(SEIPIUA).

2. Online Offline Fake Government of Telangana (OOFGoT)

Online FGoT

<http://jntuhjac.com> is a website with the cybercriminal content in the image to the R.H.S of its home page is known as Online Fake Government of Telangana (Online-FGoT). It committed nearly four cybercrimes, namely 1. SEIPIUA violation, 2. Cheating the Nation crime, 3. Seditious Law violation, and 4. Identity Theft [4-6]. It is an organized online cybercriminal group with nearly 2014 members registered in it. It has more than 20,000 as the value for the degree of cybercrime.

Figure 2: Screenshot dated 12Nov2011

Not-online FGoT (Offline FGoT)

The JNTUJAC which is an offline organized cybercriminal group has been prevailing in the JNTUH academic environment since 2011. There is a clear cut evidence collected and stored by us against the association of Online FGoT mentioned above with the JNTUJAC. JNTUJAC is an India abusive cybercrime group [26-27] as depicted in figure 3 below.

Figure 3: JNTUJAC - an Offline Organization Prevalent in the JNTUH Academic Community is an Abusive Team

3. Research Methodology

Our research methodology comprises the steps and methodology that can be utilized effectively for the defusion of the deleterious impacts of the OOFGoT.

A. Online Offline Defusion of FGoT

Online and offline criminal activities of FGoT require both online and offline defusing mechanisms for effective remedy. The figure 4 shown below depicts how the online and offline defusion methods, Knowledge Management (KM), Knowledge Engineering (KE), and Data Collection and Analysis (DCA) systems are meant for defusing the deleterious effects of online offline criminal activities in the community or societal context. The online offline remedial activities greatly assist in transforming the ill-effected cybercriminal society into Swach Digital society [7-12]. Though we mentioned Knowledge Engineering

and Knowledge Management systems as remedial measures for cybercrimes, they are not the subject under detailed coverage in our work at present.

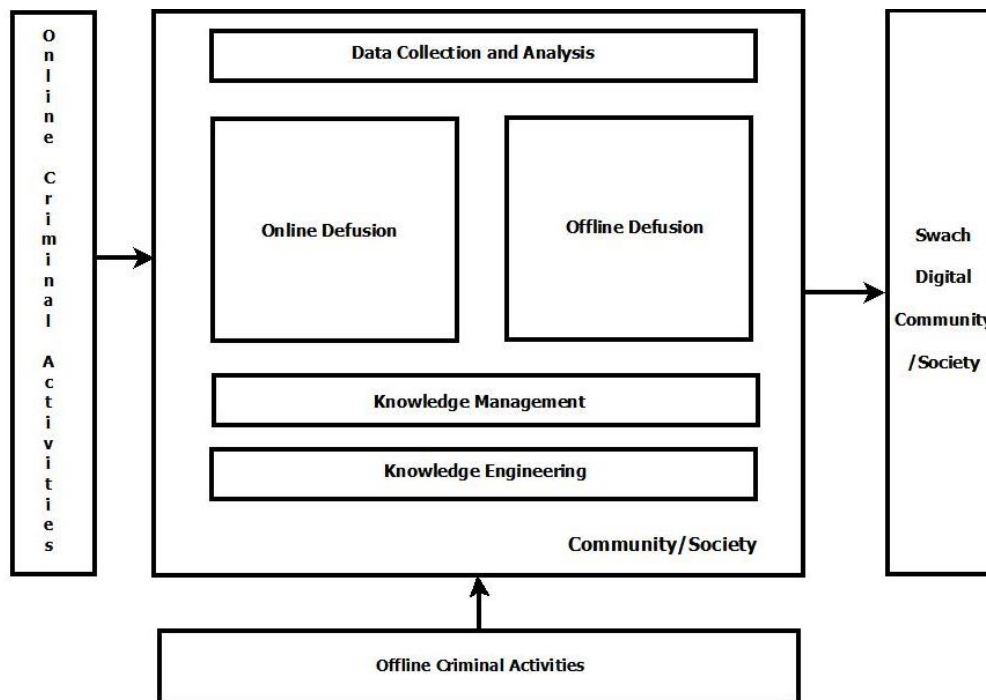

Figure 4: Online Offline Defusion of Deleterious Effects of Online Offline Fake Government of Telangana (OOFGoT)

Online Defusion of FGoT

Online defusion of FGoT refers to the activities that are conducted online such as guiding and bringing awareness to people through People’s Governance Forum (PGF) web devices [13] as shown in figure 5, performing online social interactions with proper online communities on Internet for remedial analytics using Social Networking Site accounts such as Facebook, Twitter etc. as shown in figure 6 below. These activities drive the motivation for defusing the deleterious effects of the cybercrimes.

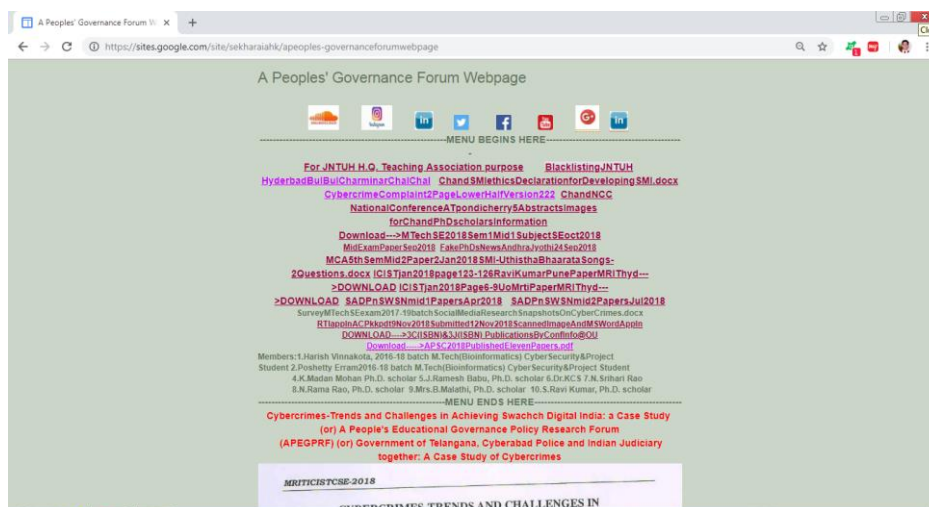

Figure 5: Snapshot of the People's Governance Forum(PGF) with URL: <https://sites.google.com/site/sekharaiakh/apeoples-governanceforumwebpage>

Figure 6: Snapshot of the Facebook Account of Prof. K.Chandra Sekharaiah with URL: <https://www.facebook.com/kcraiah> showing interactions with peers and others

Not-online Defusion of FGOT

In our search of an exhaustive approach as the remedy of cybercrime, RTI Act 2005 was very much helpful as empirical tool and we have reasonably succeeded in our efforts as shown in figures 7(a) and 7(b). Forming Pronational workforce which works for the well being of our nation is itself another big achievement that has much empirical value [14-25].

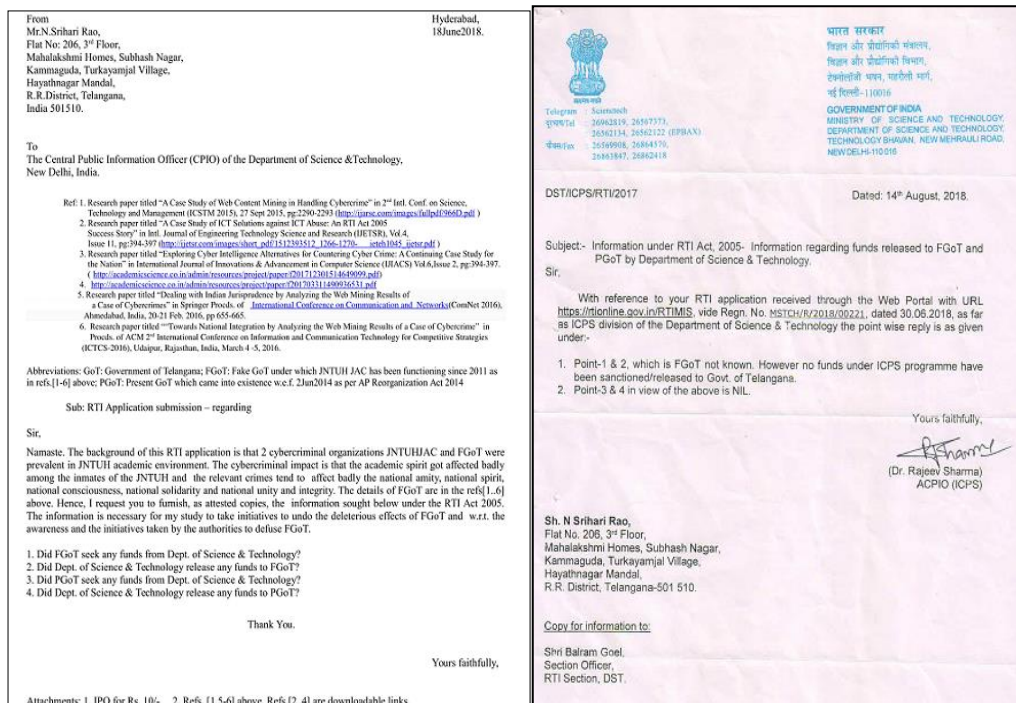

Figure 7: a) Image of the RTI Request Document Sent to Dept. of Science and Technology (DST), New Delhi b) Image of the RTI Response Document Received from DST, New Delhi

B. Data Collection and Analysis for Cybercrime Remediying

We gathered data through RTI Act 2005 from the public authorities mentioned in the table 1 below, and analyzed to bring out the essence and required methods for handling of these cybercrimes. We contributed significant time and efforts to bring awareness about these

cybercrimes to various supreme public authorities of our country. From the RTI requests sent and responses received by us, we empirically drew that the cybercrime case is effectively communicated to the above public authorities and their response indicates that the cybercrimes should be dealt properly. Otherwise, there will be an extreme increase in the cybercrime rate which endangers the nation and national spirit. We received the response from the PIO namely, Department of Science & Technology (DST) is as shown in figure 7(b) above. This sample indicates our efforts are fruitful and we have got the expected results.

Table1: Details of RTI Request-Response Communications with various Public Depts. of India

S.No	PIO Details	Response Received for RTI Request (Yes/No)	Responded with Proper Answers (Yes/No)	Usable for Data Analysis (Yes/No/Partially)	First Appeal Sent in Case of no/Improper Response (Yes/No)	Response Received for Appeal (Yes/No)
1	Principal Secretary to Governor	Yes	No	Partially	Yes	Yes
2	Principal Secretary to the Prime Minister	Yes	No	Partially	Yes	No
3	A.P Chief Secretary, A.P Secretariat Office	Yes	Yes	Partially	Yes	No
4	University Grants Commission (UGC)	No	--	Partially	Yes	No
5	Department of Science & Technology (DST)	Yes	No	Partially	No	--
6	Rajya Sabha Secretariat, Parliament House Annexe	Yes	No	Partially	Yes	Yes
7	Telangana State Public Service Commission (TSPSC)	Yes	Yes	Yes	No	--

The figure 8 shown below is a tree that takes our efforts as mulch to nurture and produces the achievements as fruits of the tree to animal or human kind.

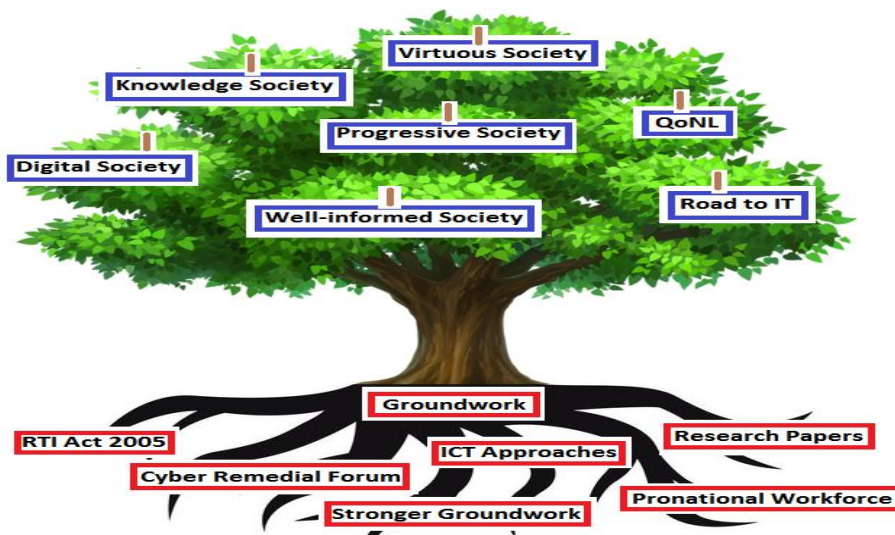

Figure 8: Tree of Efforts and Achievements

This research work was presented as a poster in Andhra Pradesh Science Congress-2018 conducted at Yogi Veamana University, Kadapa on 10 November 2018. That presentation was video recorded, uploaded in YouTube and can be found at URL: https://www.youtube.com/watch?v=beoe_zCrQzA.

5. Conclusions and Future Scope

We utilized both IT solutions and empirical studies for bringing out right information into JNTUH academic environment and hence into Telangana society. We brought awareness about the context of these cybercrimes among the close and concerned local public authorities through registration of complaints against these cybercrimes. We also gathered data through RTI applications from various supreme public authorities about their actions and reactions against these cybercrimes, and analyzed them for effective remedial analytics and handling of these cybercrimes. The response from these public authorities namely, Governor's Secretariat, the Prime Minister's Office, A.P Secretariat Office, DST, Rajya Sabha Secretariat, and TSPSC reflect the fact that these kinds of cybercrime incidents were not desirable for any nation. They destroy the national spirit and pave way for more cybercrimes, if the related cybercriminals are left unpunished. We sensitize and insist the cyberpolice to pass orders to prohibit the JNTUHJAC and FGoT cybercriminal organizations and honestly work for conviction of these cybercriminals related to this cybercrime case [28-31]. We would work in future to bring out Knowledge-based systems and awareness systems and to set up systemic studies towards remedial solutions for any cybercrime.
